International tourists in the Great Barrier Reef region

The Social and Economic Long-Term Monitoring Program (SELTMP) is assisting Reef managers and other decision makers within the Great Barrier Reef region to incorporate the human dimension into their planning and management. For more information, visit https://research.csiro.au/seltmp.

Since 2013, we have surveyed more than 12,300 people including coastal residents, tourists, commercial fishers and tourism operators in the Great Barrier Reef region as well as Australian residents around the country. We ask questions about resource dependency, use, well-being, values, aspirations, stewardship, capacity, satisfaction, understanding, perceptions of management, networks and economic viability.

This brochure takes a closer look at international visitors in the Great Barrier Reef region, including their values, perceptions and concerns about the Reef.

Long-term social and economic monitoring helps Reef managers understand the current status, historical trends and possible future trajectories of Reef users, industries and communities. It helps build a picture of how industries and communities are likely to respond and cope with changes in the environment and society. It can also assist in evaluating the effectiveness of management interventions.

Approximately 90% of tourism visits to the Great Barrier Reef occur in the Cairns and Whitsundays regions.

The Social and Economic Long-Term Monitoring Program has been jointly funded by CSIRO, and the Australian and Queensland governments as part of the Reef 2050 Integrated Monitoring and Reporting Program.
What do international tourists trust most for information about the Great Barrier Reef?

1. Scientists
2. Reef managers
3. Conservation NGOs

What do international tourists see as the greatest threats to the Great Barrier Reef?

1. Climate change
2. Pollution
3. Tourism

What do international tourists value the most about the Great Barrier Reef?

1. Biodiversity
2. Scientific and educational
3. Aesthetic

86% of international tourists surveyed were first-time visitors to the Great Barrier Reef region, 67% visited the Great Barrier Reef during their stay, and the median length of stay in the region was 10 days.

Respondents came from 35 countries.

Data from 805 international tourists surveyed in the GBR region in June–July 2017.

87% were first-time visitors to the Great Barrier Reef region.
67% visited the Great Barrier Reef during their stay.
Median length of stay in the region = 10 days.

86% of respondents were first-time visitors to the Great Barrier Reef region.
67% of respondents visited the Great Barrier Reef during their stay.
Median length of stay in the region = 10 days.

87% were first-time visitors to the Great Barrier Reef region.
67% visited the Great Barrier Reef during their stay.
Median length of stay in the region = 10 days.

**VALUES**

- What do international tourists value the most about the Great Barrier Reef?
  - 1. Biodiversity
  - 2. Scientific and educational
  - 3. Aesthetic

**PERCEIVED THREATS**

- What do international tourists see as the greatest threats to the Great Barrier Reef?
  - 1. Climate change
  - 2. Pollution
  - 3. Tourism

**CONCERNS**

- 87% are worried about climate change impacts on the Reef
- 66% feel they would be personally affected if the health of the Reef declines
- 16% think enough is being done to effectively manage the Reef

**TRUST**

- Who do international tourists trust most for information about the Great Barrier Reef?
  - 1. Scientists
  - 2. Reef managers
  - 3. Conservation NGOs

**STEWARDSHIP**

- 84% would like to do more to help protect the Reef
- 84% would like to learn more about the condition of the Reef
- 64% believe they can make a personal difference in improving the health of the Reef
